22. (Currently Amended) ~~The air induction body assembly of Claim 13~~
~~wherein~~ An air induction body assembly for a vehicle, comprising:

a carrier having a first sealing interface for a manifold and a second
sealing interface for an engine cylinder;

at least one air opening extending through said carrier, said at least one air
opening for communicating air to the engine cylinder;

at least one valve mounted to said carrier, said at least one valve for
controlling the communication of air through said at least one opening;

said carrier having a support for a fuel injector, said fuel injector supported by
said support; and

said fuel injector ~~has~~ having a discharge end portion for discharging fuel spaced
from a receiving end portion for receiving fuel, said at least one valve located closer to
said discharge end portion for discharging fuel than to said receiving end portion for
receiving fuel.

23. (Previously Presented) The air induction body assembly of Claim 22
wherein said at least one valve is located proximate said discharge end portion for
discharging fuel.
